

# Referring Your Patients to a *Fertility* Specialist

## DALLAS-FORT WORTH FERTILITY ASSOCIATES

GROWING FAMILY TREES SINCE 1999

# About Us

At **DFW Fertility Associates**, our practice is founded on superior IVF success rates, personalized patient care, cutting-edge technology, and affordable treatment costs. We are dedicated to delivering the highest-quality care with compassion and kindness while meeting the personalized needs of patients and their families.

As one of the largest independently owned fertility practices in the nation, we offer patients access to the most innovative treatments to give them the best fertility care possible and the highest chances of success.

Our experienced team of six reproductive endocrinologists serve patients in four convenient locations throughout the DFW area, and our offices are designed with patient comfort in mind.

Our physicians go above and beyond for our patients to bring them the latest treatments and services, including our state-of-the-art IVF and andrology laboratories, and we are proud of the tremendous success we've had helping our patients become parents.

With 30+ years of experience serving the DFW community, we have helped thousands of families realize their dream of parenthood. We care deeply about those struggling with infertility and are ready to help your patients on their fertility journey.

# How to *Refer* Your Patients to Us

We understand that time is critical when treating infertility. We encourage you to refer any patient with concerns about infertility or who has been unsuccessfully trying to conceive for 6-12 months. In addition, we want to see your patients who meet any of the following criteria:

- AMH (Anti-Müllerian hormone) levels less than 1.0
- FSH (follicle-stimulating hormone) levels of 10.0 or above
- Patient aged 35 or older who has been unable to conceive
- Patients who have had a tubal ligation or tubal obstruction
- Patients with symptoms of oligo-ovulation
- History of PCOS, endometriosis, or certain genetic diseases
- Abnormal semen analysis

- Patients with a cancer diagnosis preparing for treatment and interested in fertility preservation
- Patients interested in fertility preservation for future family building

For referrals, please send medical records for any up-to-date annual exams and well-women checks, as well as the results of any preliminary testing (if performed) so that our fertility specialists can review this information prior to the patient's initial consultation.

Providers may call us on behalf of your patient to make the referral or submit our referral form. To make a referral or request a copy of the referral form, call **214-730-5807** or email us at [referrals@dallasfertility.com](mailto:referrals@dallasfertility.com). Patients can also always call directly for an appointment and mention your referral.

# Testing for *Male* Patients

The andrology laboratories at DFW Fertility Associates provide onsite tests and services at four locations in Dallas, Southlake and Plano to evaluate fertility potential for male patients. Our state-of-the-art laboratories use WHO Criteria for semen analysis.

- Semen Analysis
- Semen Volume
- Sperm Concentration
- Sperm Motility
- Sperm Morphology
- Total Motile Sperm Count

# Testing for *Female* Patients

In addition to a physical exam and sonogram to identify anatomical irregularities, we offer the following testing for female patients to help determine potential causes of infertility.

- TSH (Thyroid Stimulating Hormone)
- LH (Luteinizing Hormone)
- AMH (Anti-Müllerian Hormone)
- FSH (Follicle Stimulating Hormone)
- E2 (Estradiol)
- HSG (Hysterosalpingogram)
- Pelvic Ultrasound
- Prolactin\*

\*Optional

## What to Expect *After* Referring Your Patient

Once you refer your patient, our experienced clinicians will carefully review the information and our staff will reach out to schedule a complete fertility health assessment. After the initial consultation, we will send you a consultation note to update your records.

Our team of experts combines experience, technology, and advanced training to ensure that every patient receives high-quality medical care in a sensitive, caring, and safe environment. Throughout your patient's treatment, we give referring providers priority access to our entire team of physicians. Once a patient becomes pregnant, we always send them back to the referring provider or practice.

We make it a priority to see all patients as quickly as possible. For urgent cases, please contact us directly at [referrals@dallasfertility.com](mailto:referrals@dallasfertility.com) or 214-363-5965, so that we can prioritize medically urgent cases, such as oncofertility patients or those with surgical needs.
